

CH. III: METHODS OF PRODUCTION

ICED AMERICANO

An Iced Americano is ice water mixed with espresso.

- 1** Fill a cold cup with ice to the line 1" below the top of the cup, then fill with cold water to the top of the ice.
- 2** Pull the appropriate number of espresso shots as per the 'flavor standard'. Then mix the shots with 2oz of cold water to cool the espresso.
- 3** Then pour the espresso/cold water combo over the ice water. Briefly stir to integrate the shots fully into the drink.

Notes:
