

CH. IV: CLEANING & MAINTENANCE

FETCO AUTO-DRIP BREWER

Daily

- 1 Wipe the area above the brew basket to remove coffee residue.

- 2 Clean the Cascading Spray Dome (CSD) with a soft brush and detergent.

- 3 Wipe down the exterior of the machine with stainless steel polisher.

Notes:

Weekly

- 1 Perform the daily cleaning.
-
- 2 Soak your brew baskets in a bath with hot water and 3T of urn cleaner for 10-15 minutes. Use enough water such that the baskets are completely submerged. Once they have finished soaking, scrub them with a green scrubby to remove any coffee oils, stains, or particles. Rinse them thoroughly with cold water to remove any traces of urn cleaner.

Semi-Annually

- 1 Check brew levels to make sure that you are getting the programmed yield.
-
- 2 Check the temperature (programmed to brew at 202 degrees).
-
- 3 Check fittings to make sure that there are no visible leaks.
-
- 4 Check filter to make sure that you are within the expiration date.

Notes:
