CHAPTER V > WHAT IS TEA? > ICED TEA ON AN AUTO-DRIP BREWER

CH. V: METHODS OF PRODUCTION

ICED TEA ON AN AUTO-DRIP BREWER

- 1** For a 1-gallon batch of iced tea, first **LOCATE YOUR ICED TEA BREW BASKET**. Do not brew using your coffee brew basket, as future batches of coffee will taste like tea!
- 2** Insert a paper filter, then use either a 1-gallon iced tea pouch, or 1.25oz of loose tea.
- 3** Center your iced tea dispenser under the brew basket, then brew using the 1/2 gallon setting (could also be 2-quarts or 2-liters). You are brewing a 1/2 gallon of concentrate.
- 4** When the batch is complete, add 1/2 gallon cold water to dilute the batch.
- 5** Store the iced tea in the fridge. It will keep up to 5 days.

Notes:
